

Does your Moodle need a facelift?

We will create a theme for your LMS which not only matches the branding of your school but also provides users with an accessible and intuitive interface which encourages engagement.

Each of our designs is fully responsive, which means your platform will look pixel-perfect on a desktop, tablet or smartphone.

Are you looking to get your staff up to speed?

We offer a range of training programmes for your administrative and teaching staff, ensuring everyone involved feels confident and comfortable with Moodle.

Sessions can be booked as one-to-one or group training, and will be performed in person at your school. Remote sessions or Internet conferencing are available if you prefer.

Do you want Moodle to talk to your MIS software?

If you're using Moodle alongside an MIS like SIMS, CMIS, iSAMS or Veracross, you could benefit from our integration solution to get your MIS and LMS working together to achieve:

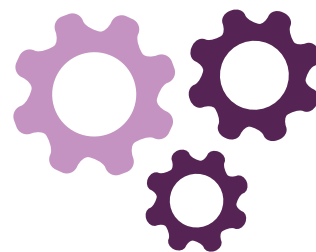

- Automated user and course management
- Online, real time reporting for students, parents and staff
- Online attendance logging, report writing and grading
- SMS and email messaging to students, parents and staff

Do you need some help with the technical stuff?

We're able to provide assistance via telephone, email or web chat, on either a contract or pay as you go basis.

We believe in a proactive approach, so we offer advice and guidance on making the most of your Moodle, whether that's recommending plugins to use, innovative ways to structure your courses or advice on engaging staff or pupils.

Are you looking to enhance your hosting?

We'll help you to select and configure a hosting environment which offers the best value for money whilst ensuring a high level of performance and availability, and allows for future expansion.

This could be cloud hosting, a local data centre, or a server at the school itself. In each case, we can manage the hosting and backups on your behalf, delivering a resilient, secure and reliable service.

Do you want to talk to someone about Moodle?

If you're simply looking for advice on Moodle, we're happy to provide consultancy - whether it's an initial foray into the world of online learning, or advice on an existing Moodle platform.

We offer a noncommittal, client-led approach to help you get the most out of Moodle, whatever stage you're at. If you'd like to book an initial session to discuss your current situation and the options available, we offer this free of charge.
